## TRACTO-TECHNIK GmbH & Co. KG | PIPE BENDING SYSTEMS

### TRACTO-TECHNIK GmbH & Co. KG (TT)

- TT was founded in 1962
- TT engages about 500 employees worldwide
- TT is internationally oriented and exports its products to more than 70 countries
- TT obtained several awards for innovations and outstanding service
- TT actually occupies more than 350 valid patents
- TT business units: NODIG and PBS

### PIPE BENDING SYSTEMS (PBS)

- PBS has been a competent partner in pipe fabrication for more than five decades
- PBS is an expert in customized piping and pipe pre-fabrication, particularly with regard to single parts and small series production
- PBS develops and produces innovative, high-performance machine technology, precise measuring systems and intelligent software solutions
- PBS combines machinery, measuring technology and software to system solutions with high customer benefit
- PBS stands for simplicity and efficiency... simply smart.

## PIPE BENDING SYSTEMS | Our strategy

- Integration of machinery, measuring technology and software solutions in different combinations and levels of deployment to PIPE BENDING SYSTEMS

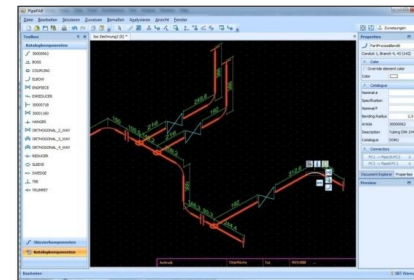

Innovative machinery

- Pipe bending machines
- Pipe end processing
- Connection technology

Precise measuring technology

- Optical measuring systems
- Coordinate measuring arms
- Pipe measuring software

Efficient software solutions

- Pipe bending software
- Workflow management software

## PIPE BENDING SYSTEMS | Our products

Working center for hydraulic piping

**TUBOMAT**

Semi-automatic pipe bending machines

**TUBOBEND**

CNC pipe bending machines

**TUBOTRON**

All-electric CNC pipe bending machines

**TUBOTRON VARIO**

Pipe end processing & connection technology

**TUBOFORM / TUBOGRAT**

Pipe measuring systems

**TUBOSCAN**

Software solutions

**PIPEFAB**

Automated fabrication of template pipes

**SCOPELINK / ROBOFIX**

## TUBOMAT | The professional solution for customized piping

The TUBOMAT :

- ... combines trendsetting technology and a modern industrial design with proven functionalities and reliability.
- ... is characterized by latest control technology and ease of operation.
- ... features numerous optimizations regarding functionality, ergonomics and energy efficiency.
- ... is the perfect entry into the best system for customized piping.

## TUBOMAT | The professional solution for customized piping

### Technical data

max. pipe diameter	.....	48,3 mm
max. bending radius *	.....	125 mm
Control	.....	SIMATIC TP
bending speed	.....	20 °/s
bending accuracy	.....	± 0.2 °

\* depends on pipe diameter

## TUBOMAT 3<sup>rd</sup> generation - improvements and optimisations

- ▶▶ MODERN SYSTEM CONTROL FOR PROGRAM MODE OR 4-FOLD BENDING ANGLE PRESELECTION
- ▶▶ POSSIBILITY OF IMPORTING PIPEFAB BENDING DATA
- ▶▶ OPTIMISED TOOL CONCEPT FOR BENDING
- ▶▶ COMPLETELY MODULAR STRUCTURE
- ▶▶ EXPOSED AND COMPACT BENDING HEAD
- ▶▶ ERGONOMICALLY OPTIMISED WORKFLOWS
- ▶▶ APPROVED BENDING OPERATION BY HAND LEVER VALVE
- ▶▶ MODERN DESIGN
- ▶▶ OPTIMISED POSITION OF THE PIPE DEBURRERS
- ▶▶ ELEKTRONICALLY CONTROLLED CUTTING-RING ASSEMBLY
- ▶▶ FOLDING SAW BLADE PROTECTION COVER
- ▶▶ SWIVELLING CUTTING-RING ASSEMBLY / FLARING UNIT
- ▶▶ ADJUSTABLE SAW FEED
- ▶▶ SAW CUT VISUALISATION BY MEANS OF A LINE LASER

## TUBOMAT | The professional solution for customized piping

The TUBOMAT can be flexibly configured from a pure bending machine to a complete tube processing centre with the functions sawing, deburring, cutting ring assembly and flaring.

## TUBOMAT | The professional solution for customized piping

Up to 5 working functions for hydraulic piping in just one compact machine

**Sawing**

**Deburring**

**Bending**

**Cutting ring assembly**

**Flaring**

## TUBOBEND | Semi-automatic pipe bending machines

Perfectly suited for manual pre-fabrication in small and medium sized batches

TUBOBEND 16

TUBOBEND 25

TUBOBEND 42

TUBOBEND 60

TUBOBEND 80

Bending direction either  
right or left

## TUBOBEND 25

### Technical data

max. pipe diameter	.....	25,0 mm
max. bending radius *	.....	75,0 mm
Control	.....	SIMATIC TP
bending speed	.....	58 °/s
bending accuracy	.....	± 0,2 °

\* depends on pipe diameter

## TUBOBEND 25

### Basic equipment / features

- Compact and exposed bending head for maximum bending space
- Electronic control for bending axes with 7" Touch Panel, set point / actual value display, automatic sequencing of data records and storage capability for 100 bending programs
- Ergonomically optimized control panel
- Positioning device for pipe length and rotation, incl. 3-jaw chuck, stoppers and comfortable transversal adjustment
- Hydraulic pipe clamping with adjustable clamping pressure
- Hydraulic pressure die positioning
- Hydraulic mandrel retraction unit with comfortable transversal adjustment
- Maintenance-friendly housing concept with optimized accessibility
- Modern industrial design
- Machine mobile and flexible to use
- Optional right or left hand bending direction

### Variable additional equipment / accessories

- Mechanical quick collet chuck or hydraulic collet chuck
- Adjustable bending speed
- Length and rotation measuring system with digital display
- Comfortable sequencing of the data records for stopper adjustment
- Breaking system for length and rotation positioning of pipe
- Mandrel lubrication device
- Interface for data import from PIPEFAB pipe bending software

Application example: hydraulic pipe  
carbon steel  $\varnothing$  22,0 x 2,0 mm

## TUBOBEND 42

Bending direction either  
right or left

### Technical data

max. pipe diameter	.....	42,0 mm
max. bending radius *	.....	125 mm
Control	.....	SIMATIC TP
bending speed	.....	44 °/s
bending accuracy	.....	± 0.1 °

\* depends on pipe diameter

## TUBOBEND 42

### Basic equipment / features

- Compact and exposed bending head for maximum bending space
- Electronic control for bending axes with 7" Touch Panel, set point / actual value display, automatic sequencing of data records and storage capability for 100 bending programs
- Ergonomically optimized control panel
- Positioning device for pipe length and rotation, incl. 3-jaw chuck, stoppers and comfortable transversal adjustment
- Hydraulic pipe clamping with adjustable clamping pressure
- Hydraulic pressure die positioning
- Hydraulic mandrel retraction unit with comfortable transversal adjustment
- Maintenance-friendly housing concept with optimized accessibility
- Modern industrial design
- Machine mobile and flexible to use
- Optional right or left hand bending direction

### Additional equipment / accessories

- Mechanical quick collet chuck or hydraulic collet chuck
- Adjustable bending speed
- Length and rotation measuring system with digital display
- Comfortable sequencing of the data records for stopper adjustment
- Breaking system for length and rotation positioning of pipe
- Mandrel lubrication device
- Interface for data import from PIPEFAB pipe bending software

Application example: hydraulic pipe  
carbon steel  $\varnothing 42,0 \times 3,0$  mm

## TUBOBEND 42

Ergonomically optimized control panel,  
individually adjustable

Clear arrangement of function keys

Mechanical quick collet chuck  
(Option)

## TUBOBEND 80 | Semi-automatic pipe bending machine

Technical data			
Max. pipe diameter .....	76.1 mm	Max. bending speed .....	16 °/s
Max. bending radius .....	190 mm	Bending accuracy .....	± 0.2 °

## TUBOBEND 80 | Semi-automatic pipe bending machine

### Basic equipment / features

- Exposed bending head for maximum bending space
- Electronic SIMATIC Touch Panel control with user guidance, automatic sequencing of the data records and storage capability for 100 bending programs
- Hydraulic pipe clamping with adjustable clamping pressure
- Hydraulic pressure die positioning
- Follower-type pressure die (sliding guide)
- Hydraulic mandrel retraction

### Options / accessories

- Positioning device for pipe length and rotation, incl. 3-jaw chuck
- Mechanical collet chuck or hydraulic collet chuck
- Adjustable bending speed
- Follower-type pressure die (linear guiding)
- Pressure die assist
- Automatic pressure die retraction
- Length and rotation measuring system with digital display
- Anticipated mandrel retraction for optimizing the bend quality
- Mandrel lubrication device
- Remote control or foot switch for bending and clamping function

Application example: square pipe,  
mild steel □ 40.0 x 40.0 x 3.0 mm

## TUBOTRON | CNC pipe bending machines

Perfectly suited for automated pre-fabrication of pipes

TUBOTRON 20 / 25 / 30

TUBOTRON 140 / 170

TUBOTRON 50 / 60 / 90

TUBOTRON VARIO

## TUBOTRON 20 | CNC pipe bending machine

Technical data			
Max. pipe diameter	20 mm	Max. pipe feed	2000 mm/s
Max. bending radius	100 mm	Max. pipe rotation	880 °/s
Max. bending speed	450 °/s	Positioning accuracy	± 0.05 ° [mm]

## TUBOTRON 20 | CNC pipe bending machine

### Features / Equipment

- Programmable sequence control with user guidance via SIMATIC Touch PC
- Servo-electric bending drive
- Hydraulic pipe clamping (pressure control)
- Hydraulic pressure die positioning
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 25 | CNC pipe bending machine

### Features / Equipment

- Programmable sequence control with user guidance via SIMATIC Touch PC
- Servo-electric bending drive
- Pneumatic pipe clamping (mechanical fine adjustment)
- Pneumatic pressure die positioning (mechanical fine adjustment)
- Pneumatic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Servo-electric and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance

## TUBOTRON 25 | CNC pipe bending machine

Technical data			
Max. pipe diameter .....	25 mm	Max. pipe feed .....	1600 mm/s
Max. bending radius .....	140 mm	Max. pipe rotation .....	360 °/s
Max. bending speed .....	170 °/s	Positioning accuracy .....	± 0.05 ° [mm]

## TUBOTRON 25 MR | CNC pipe bending machine

### Features / Equipment

- Programmable sequence control with user guidance via SIMATIC Touch PC
- Bending head with servo-electric horizontal and vertical axes allows for multi-radii bending (stack tooling)
- Servo-electric bending drive
- Pneumatic pipe clamping (mechanical fine adjustment)
- Pneumatic pressure die positioning (mechanical fine adjustment)
- Pneumatic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Servo-electric and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance

## TUBOTRON 25 MR | CNC pipe bending machine

Technical data			
Max. pipe diameter .....	25 mm	Max. pipe feed .....	1600 mm/s
Max. bending radius .....	140 mm	Max. pipe rotation .....	360 °/s
Max. bending speed .....	170 °/s	Positioning accuracy .....	± 0.05 ° [mm]

## TUBOTRON 30 | CNC pipe bending machine

### Technical data

Max. pipe diameter .....	30,0 mm
Max. bending radius * .....	200 mm
Control .....	SIMATIC S7
Max. bending speed .....	140 °/s
Max. pipe feed .....	1600 mm/s
Max. pipe rotation .....	360 °/s
Positioning accuracy .....	± 0.05 ° [mm]
Length available .....	3000 / 4500 / 6000 mm

\* depends on pipe diameter

## TUBOTRON 30 | CNC pipe bending machine

### Basic equipment / features

- Programmable sequence control with user guidance via SIMATIC Box PC with touch panel
- Possible connection to PC-network
- Hydraulic bending drive
- Hydraulic pipe clamping, programmable clamping power
- Hydraulic pressure die positioning
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic mandrel lubrication
- Pipe and mandrel support
- Remote maintenance via internet VPN and remote connection TCP/IP
- Oil cooler

### Safety devices

- Safety laser scanner for protection of bending area
- Safety cover for protection of machine bed area

## TUBOTRON 50 | CNC pipe bending machine

Technical data			
Max. pipe diameter.	50 mm	Max. pipe feed	750 mm/s
Max. bending radius	200 mm	Max. pipe rotation	120 °/s
Max. bending speed	43 °/s	Positioning accuracy	± 0.05 ° [mm]

## TUBOTRON 50 | CNC pipe bending machine

### Features / Equipment :

- Programmable sequence control with comfortable user guidance via SIMATIC Touch PC (alt.: SIMATIC OP)
- Hydraulic bending drive
- Hydraulic pipe clamping (pressure control)
- Hydraulic pressure die positioning, following pressure die
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 60 | CNC pipe bending machine

Technical data			
Max. pipe diameter	60.3 mm	Max. pipe feed	750 mm/s
Max. bending radius	200 mm	Max. pipe rotation	120 °/s
Max. bending speed	32 °/s	Positioning accuracy	± 0.05 ° [mm]

## TUBOTRON 60 | CNC pipe bending machine

### Features / Equipment

- Programmable sequence control with user guidance via SIMATIC Touch PC
- Hydraulic bending drive
- Hydraulic pipe clamping (pressure control)
- Hydraulic pressure die positioning (mechanical fine adjustment), following pressure die (linear guiding, with pressure die assist)
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 90 | CNC pipe bending machine

Technical data			
Max. pipe diameter	90 mm	Max. pipe feed	420 mm/s
Max. bending radius	250 mm	Max. pipe rotation	100 °/s
Max. bending speed	43 °/s	Positioning accuracy	± 0.05 ° [mm]

## TUBOTRON 90 S | CNC pipe bending machine

Technical data			
Max. pipe diameter	108 mm	Max. pipe feed	420 mm/s
Max. bending radius	250 mm	Max. pipe rotation	100 °/s
Max. bending speed	32 °/s	Positioning accuracy	± 0.05 ° [mm]

## TUBOTRON 90 / 90S | CNC pipe bending machine

### Features / Equipment :

- Programmable sequence control with comfortable user guidance via SIMATIC Touch PC
- Hydraulic bending drive
- Hydraulic pipe clamping (pressure control)
- Hydraulic pressure die positioning (distance control), following pressure die (linear guiding, with pressure die assist)
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 140 | CNC pipe bending machine

Technical data			
Max. pipe diameter	140 mm	Max. pipe feed	630 mm/s
Max. bending radius	420 mm	Max. pipe rotation	70 °/s
Max. bending speed	16 °/s	Positioning accuracy	± 0.1 ° [mm]

## TUBOTRON 140 | CNC pipe bending machine

### Features / Equipment :

- Programmable sequence control with comfortable user guidance via SIMATIC Touch PC
- Hydraulic bending drive
- Hydraulic pipe clamping (pressure and distance control)
- Hydraulic pressure die positioning (pressure and distance control), following pressure die (linear guiding, with pressure die assist)
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- Quick-change system for the bending tools
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

Technical data			
Max. pipe diameter	170 mm	Max. pipe feed	410 mm/s
Max. bending radius	510 mm	Max. pipe rotation	50 °/s
Max. bending speed	11,5 °/s	Positioning accuracy	± 0.1 ° [mm]

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

### Features / Equipment

- Programmable sequence control with user guidance via SIMATIC Touch PC
- Hydraulic bending drive
- Hydraulic pipe clamping (pressure and distance control)
- Hydraulic pressure die positioning (pressure and distance control), following pressure die (linear guiding, with pressure die assist)
- Hydraulic long-neck collet chuck allows for pipe positioning in the pressure die area (with re-gripping function)
- Hydraulic and anticipated mandrel retraction
- Automatic minimum quantity mandrel lubrication
- Pipe and mandrel support
- [Quick-change system for the bending tools](#)
- Interface for remote maintenance
- Oil cooler

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

Steel pipe (St 52)  
Ø 101.6 x 17.5 mm

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

Steel pipe (St 52)  
Ø 114.3 x 17.5 mm

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

Steel pipe (St 52)  
Ø 139.7 x 22.2 mm

## TUBOTRON 170 / 170 HD | CNC pipe bending machine

Steel pipe (St 52)  
Ø 168.3 x 4.5 mm

## TUBOTRON 170 | Quick-change system for the bending tools

## TUBOTRON 170 | Quick-change system for the bending tools

## TUBOTRON 170 | Quick-change system for the bending tools

## TUBOTRON 170 | Quick-change system for the bending tools

## TUBOTRON VARIO 40 RL | Multi-radii right-and-left hand bender

Technical data			
Max. pipe diameter .....	42 mm	Max. pipe feed .....	1500 mm/s
Max. bending radius .....	160 mm /∞	Max. pipe rotation .....	450 °/s
Max. bending speed .....	180 °/s	Positioning accuracy .....	± 0.05 ° [mm]

## High-performance multi talents with “VARIO” equipment

### The TUBOTRON VARIO models offer the following possibilities:

- Multi-radii bending
- Right-and-left hand bending
- Freeform bending
- High bending speeds
- Maximum precision of all axes
- Comfortable operation
- Loading and unloading of workpieces can be automated

## TUBOTRON VARIO 40 RL

## TUBOTRON VARIO 40 RL

## TUBOGRAT 48/60 | Internal and external deburring of pipes up to Ø 48 (60) mm

Special deburring tools  
for long service life

Universally applicable for all pipes with an outside diameter  
from 6 - 48 mm (resp. 20 - 60 mm)

Clean internal and external deburring of the pipes within  
only few seconds

Integrated collecting box for the metal chips provides for  
cleanliness at the workplace

Mobile and flexible to use

## TUBOGRAT 48/60 -- Internal and external deburring of pipes up to Ø 48 (60) mm

TUBOGRAT 48

TUBOGRAT 60

Technical data	TUBOGRAT 48	TUBOGRAT 60
Pipe diameter range	6 – 48 mm	20 – 60 mm
Tooling rotation speed	140 / 280 min <sup>-1</sup>	140 / 280 min <sup>-1</sup>
Weight, approx.	21 kg	33 kg
Connected load	0.12 kW	0.37 kW

## TUBOGRAT K | Deburring of pipe ends

Deburring of pipes with different diameter ranges  
(depends on the tooling)

Special deburring tools with adjustable depth stop  
allow for defined deburring of pipe ends  
recommended for thin walled pipes

Integrated collecting box for the metal chips provides  
for cleanliness at the workplace

Mobile and flexible to use

Pictures without safety cover

Deburring tools  
with adjustable  
depth stop

Technical data	TUBOGRAT K
Pipe diameter range	depends on tooling
Tooling rotation speed	140 / 280 min <sup>-1</sup>
Weight, approx.	36 kg
Connected load	0.37 kW

## TUBOFORM C | Combined cutting-ring assembly and flaring machine

Universally applicable for both, cutting-ring assembly and flaring (37° SAE, 10°) of tubes from Ø 6 to 42 mm

Short assembly times of only few seconds

Electronic pressure adjustment, manually or automatically (tool recognition system)

Faultless and accurate assembly due to automatic pressure Adjustment (tool recognition system)

Adjustable back stroke of the cylinder for optimisation of assembly times

Short set-up times for tooling when changing the pipe diameter or the working method

Batch-size counter and total piece counter

## TUBOFORM C | Combined cutting-ring assembly and flaring machine

Technical data	TUBOFORM C
Pipe diameter range	Ø 6 – 42 mm
Feeding force	173 kN
Feeding speed	6.9 mm/s
Hydraulics	3.7 l/min; 200 bar
Connected load	1.2 kW

## TUBOFORM C | Combined cutting-ring assembly and flaring machine
